

Product Data Sheet		05.08.2016	
PET Flakes clear			
<p>The PET flakes are produced from post consumer PET bottles. Post consumer PET bottles as used in the beverage industry are collected, sorted and reclaimed. These process consists of grinding, washing, separation and drying. The flakes are hot washed using caustic soda and surfactans as a cleaning additive.</p> <p>The PET flakes are not suitable for the purpose of terms of VO(EG) No 282/2008.</p>			
Properties		Value	Unit
Colour		clear	
Particle size		> 10 mm max.	5 %
Bulk density	min.	250 kg/m ³	
Moisture	max.	1,5 %	
Dust (<0,5 mm)	max.	1 %	
Purity			
Polyolefin	max.	30 ppm	
PVC	max.	20 ppm	
PA	max.	50 ppm	
Paper / labels	max.	50 ppm	
Metal	max.	10 ppm	
Other	max.	100 ppm	
PET coloured (except light blue)	max.	1.500 ppm	
PET light blue	max.	15 %	
Packaging			
1. Big Bags (2400 cm high) on one-way pallets (Weight app. 1,000 kg for Big Bag) 2. Silo truck
